Title: NASA Student Space Settlement Design Contest Collection

Collection Number: ARC20.02

Creator: Ames Research Center

Dates:

Inclusive: 2000-2018

Bulk: 2006, 2013, 2015

Extent: Volume: 2 cubic feet (with 46 digital copies, 501.4 Megabytes)

Repository:

NASA Ames History Archives

Moffett Field, California 94035

Abstract:

This collection contains a selection of student entries for NASA's annual space settlement design contest in the form of thirty four original artworks and ten technical reports created by students from around the world in grades twelve and under. Also included is a 2008 technical paper about the contest and the lessons learned from it, and a photograph of contest ephemera (a clock). The bulk of the collection has been digitized.

Administrative Information

Access: Collection is open for research.

Publication Rights: Copyright does not apply to United States government records. For non-governmental material, researcher must contact the original creator.

Languages and Scripts: All records are in English.

Preferred Citation:

Expanded:

Acquisition Information:

Donated by Ruth K. Globus on February 6, 2020 (Acc. 2020-002).

Administrative History

NASA Ames Research Center sponsored an annual international student space settlement design contest from 1994 to 2018, in conjunction with the National Space Society. The contest was co-founded and led by Ames scientist Al Globus. Each year, students were tasked with designing a permanent orbital space colony, with no restrictions on how their design should be executed or presented. Entries ranged from detailed engineering reports to artistic conceptualizations developed by both individuals and teams. The contest was intended for students in the sixth to twelfth grades, with students in different grade levels being judged separately. Over the years, participants in lower grades also submitted entries, which were accepted, and some won awards. Several categories of awards were given out, including one for art and a grand prize for the overall best entry. Submissions had to be mailed by post in paper form to arrive at Ames by March 31 of each year to be judged by a panel of the center's scientists and engineers. To keep costs down while also engaging students from around the world, administration of the contest was largely conducted through an informational website developed by Al Globus. In 2019, sponsorship of the contest, along with the website, was transferred to the National Space Society. (An archived copy of the 2018 version of the website is in the Ames History Archives. See Related Collections.)

Scope and Content

This collection comprises a conference paper about the contest presented at the 2008 International Conference on Environmental Systems, and a small assortment of contest entries from students around the world, which were accumulated by Ames senior scientist Ruth Globus. She participated as a judge and, for a time, was a NASA civil servant sponsor for the contest. Globus displayed some of the artwork in her office over the years. Also included is a photograph of space settlement design contest ephemera in the form of a clock that sat on a bookshelf in Globus's office at Ames.

Contest entries in this collection include ten technical reports, most of which are grand prize winners, and thirty four original artworks submitted by students in grades twelve and below from schools in Bulgaria, Hong Kong, India, Ireland, Romania, South Korea, and the United States. Many of the artworks received prizes for artistic merit. Some submissions have entry forms with more information, including short descriptions from the students.

The bulk of the collection has been digitized. A file index is provided for this material.

System of Arrangement

Contest entries are arranged chronologically by type (artwork or report), then by artist and team.
